

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A built-in heating cooker comprising:

a top plate;

a support supporting the top plate from underneath, the support including a top plate-supporting face contacting the top plate, and a cooker-supporting face contacting a cabinet;

a top frame covering an edge of the top plate; and

a frame constituting a cooker body, the frame having a flange disposed over the cabinet;

wherein the support ~~has~~ has the cooker-supporting face ~~for supporting the cooker body, the cooker-supporting face being positioned at~~ positioned outside of a top of the top plate-supporting face and the flange;

a first opening is provided on at least one side wall disposed between the top plate-supporting face and the cooker-supporting face; and

a second opening is provided on the top frame in a position corresponding to the first opening at a predetermined distance.

2. (Currently Amended) The built-in heating cooker as defined in Claim 1, ~~wherein a~~ wherein the flange is provided on a periphery of the frame;

the side wall of the support is positioned further inward of the cooker body than the flange end; and

the flange and a frame-supporting face provided between the side wall and the cooker-supporting face are in contact.

3. (Previously Presented) the built-in heating cooker as defined in Claim 1, wherein the side wall is provided underneath the top plate.

4. (Previously Presented) The built-in heating cooker as defined in Claim 1, wherein a wall is provided on a periphery of the cooker-supporting face of the support.

5. (Original) The built-in heating cooker as defined in Claim 3, wherein a wall is provided on a periphery of the cooker-supporting face of the support.

6. (Previously Presented) The built-in heating cooker as defined in Claim 1, wherein a sealing material is applied on an entire circumference of a bottom face of the cooker-supporting face of the support.

7. (Original) The built-in heating cooker as defined in Claim 3, wherein a sealing material is applied on an entire circumference of a bottom face of the cooker-supporting face of the support.

8. (Original) The built-in heating cooker as defined in Claim 4, wherein a sealing material is applied on an entire circumference of a bottom face of the cooker-supporting face of the support.

9. (Original) The built-in heating cooker as defined in Claim 5, wherein a sealing material is applied on an entire circumference of a bottom face of the cooker-supporting face of the support.

10. (Previously Presented) The built-in heating cooker as defined in Claim 2, wherein the side wall is provided underneath the top plate.

11. (Previously Presented) The built-in heating cooker as defined in Claim 2, wherein a wall is provided on a periphery of the cooker-supporting face of the support.

12. (Previously Presented) The built-in heating cooker as defined in Claim 2, wherein a sealing material is applied on an entire circumference of a bottom face of the cooker-supporting face of the support.

13. (Previously Presented) The built-in heating cooker as defined in Claim 10, wherein a wall is provided on a periphery of the cooker-supporting face of the support.

14. (Previously Presented) The built-in heating cooker as defined in Claim 10 wherein a sealing material is applied on an entire circumference of a bottom face of the cooker-supporting face of the support.

15. (Previously Presented) The built-in heating cooker as defined in Claim 11, wherein a sealing material is applied on an entire circumference of a bottom face of the cooker-supporting face of the support.

16. (Previously Presented) The built-in heating cooker as defined in Claim 13, wherein a sealing material is applied on an entire circumference of a bottom face of the cooker-supporting face of the support.
